GreenMorph

Transforming Waste into Wonders

About GreenMorph

GreenMorph is a sustainable startup focused on **upcycling plastic waste into innovative and eco-friendly craft products**. By blending **creativity with environmental responsibility**, **GreenMorph** aims to **reduce plastic pollution** while providing aesthetically pleasing and functional products.

Our Products

Bird Feeders from Plastic Bottles: Transform plastic bottles into charming bird feeders, perfect for gardens and promoting eco-conscious living.

Hanging Bottle Vases: Turn old bottles into hanging vases for flowers, adding a sustainable and aesthetic touch to any room.

Flower Pots: Turn Waste bottles into beautiful Flower Pots, adding a sustainable touch to any garden.

Future Vision

GreenMorph envisions a world where waste is seen as a resource. In the future, we aim to **expand our product lines into furniture and architectural pieces** while collaborating **with governments to implement large-scale waste-to-art initiatives.**

Visual Prototype

Logo

- A leaf morphing into a plastic bottle, symbolizing the transformation of waste into sustainability.
- **Color palette:** Green (environment), white (purity), and subtle orange (creativity).
